Technical Skills

Tools and Languages: Microsoft Power BI, DAX, SQL, Excel.

Other Skills: Data Visualization, Data Modeling, Business Intelligence (BI), Data Analysis.

Certifications

- Power BI – Business Intelligence for Beginners to Advance - [Certificate](#)
 - Power BI for Beginners - [Certificate](#)
 - Introduction to SQL - [Certificate](#)
-

Internship

PwC Power BI Job Simulation | The Forage | March 2025 - [Certificate](#)

- Participated in a **Hands-On** simulation designed by PwC, where I used Power BI to analyze and visualize data effectively.
 - Created interactive Power BI Dashboards to showcase insights and trends, while focusing on **Defining KPIs** to measure performance.
 - Worked on **Calculating Measures** to uncover actionable insights, which helped drive meaningful **Insights and Actions** for business **decision-making**.
 - Gained practical experience in using **DAX** for data manipulation and enhancing visual presentations.
-

Projects

Business Travel Analytics Dashboard [[Dashboard Link](#)]

- Developed a Power BI dashboard for a travel agency using **Python-generated data**.
- Tracked month-over-month revenue, analysed margins, and developed customer segmentation dashboards.
- Built financial dashboards with expense comparisons, income statement analysis, and cancellation/refund tracking.
- Implemented a **financial scenario simulator**.
- **Technical Skills Demonstrated:** Data Generation (Python Fake Data Generator), advanced Power BI visualization, revenue, margin, and customer retention analysis, and financial modelling.
- **Result:** Transformed complex travel data into strategic insights for informed decision-making and potential cost optimization.

Merch on Demand Analysis Dashboard [[Dashboard Link](#)]

- Identified an opportunity to **enhance data-driven decision-making** in the Merch-on-Demand industry.
- Generated fake data in Python to create a comprehensive dashboard.
- **Designed** a user-friendly interface with a button for detailed analysis to streamline navigation.
- Conducted product analysis, analysed customer insights, evaluated cross-sales opportunities, and developed an income statement with vertical analysis.
- Built a financial simulator to explore various what-if scenarios affecting costs and revenues.
- **Result:** Delivered a powerful dashboard that provides actionable insights, significantly improving decision-making in the Merch-on-Demand industry.

Business Performance Dashboard [[Dashboard Link](#)]

- Developed a Power BI dashboard using multiple datasets to analyse business performance.
 - Integrated diverse datasets into Power BI for comprehensive analysis.
 - Enabled a **decomposition tree** for deeper data insights.
 - Conducted margin and revenue analysis, highlighted top-performing products, and segmented customers for targeted strategies.
 - Performed **basket analysis** to understand purchasing patterns.
 - Developed a detailed balance sheet and conducted **vertical/horizontal analysis**.
 - Implemented "what-if" scenarios for financial forecasting.
 - **Result:** Delivered actionable insights that improved data-driven decision-making, enhanced strategic planning, and optimized resource allocation, ultimately boosting overall business performance.
-

Education

Bachelor of Commerce, Santa Gadge Baba Amravati University.

August 2021
